

ORDER FORM

_____ My lawn needs slice seeding, and I agree to the charge of \$ 75.00 per 1,000 sq. ft. I understand that if I currently participate in the Lawn Maintenance Program, there is a 1,000 sq. ft. minimum. For customers who do not participate in our Lawn Maintenance Program, there is a 3,000 sq. ft minimum.

_____ I do not participate in the Lawn Maintenance Program and I also need fall starter fertilizer applied to my entire lawn. I agree to the charge of \$15.00 per 1,000 sq. ft. with a 3,000 sq. ft. minimum.

_____ I would like to have my lawn core aerated. The cost is \$25.00 per 1,000 sq/ft. I understand there is a 3,000 sq/ft minimum for customers enrolled in our Lawn Maintenance Program, and a 5,000 sq/ft minimum for those customers who are not currently enrolled in our Lawn Maintenance Program.

_____ I would like to have my lawn overseeded. I understand that this is best done in conjunction to core aeration (listed directly above). The cost is \$28.00 per 1,000 sq/ft with 3,000 sq/ft minimum.

_____ I am interested in a Lawn Maintenance estimate.

(Circle One): Please call me! Or Please Take a Look and Send me an Estimate!

_____ I am tired of watering my lawn. Please call or email me about scheduling an estimate for installing a sprinkler system!

_____ Name (please print)

_____ CLS Customer Number

_____ Address

_____ Home Phone Number

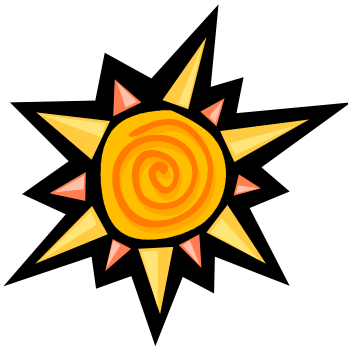

_____ Work Phone Number

_____ Email Address

We have an underground sprinkler system! We understand that the customer is responsible for flagging all sprinkler heads and valve boxes prior to CLS being able to perform either Power Slice Seeding or Core Aeration.

_____ Signature Authorizing Complete Lawn Service to Perform the Work Noted Above

_____ Date

Are you trying to restore your lawn's gorgeous, green and lush appearance? Are you tired of dragging around that hose and spending hours watering? We have solutions for you!

Before we begin our fall seeding programs, this is also the ideal time to consider having an underground irrigation system installed. We would be happy to set up a time to have our Certified Irrigation Designer meet with you to discuss your specific lawn and landscaping, and how an irrigation system could save you time and money - all while keeping your lawn and plants looking incredible – **NO MATTER HOW SEVERE THE WEATHER!** We have a limited number of slots still available to have systems installed this summer/early fall – with time left over for fall seeding.

The spring's heavy rainfall combined with the summer's heat and irregular rainfall has resulted in most un-irrigated lawns looking brown and in need of rejuvenation. Even those lawns which have been well watered are showing signs of stress and may need a bit of help to get it back in shape and keep it looking great and healthy in the coming year. Fall is *the* time for rejuvenating and strengthening your lawn through seeding, core aeration, fertilization or a combination of those! Not sure what you need? We've listed a brief description below, but if you still have questions, let us help – just give us a call or email, office@completelawn.com and we are happy to answer all of your questions!

PLEASE NOTE: If you already have a sprinkler system and are having power slice seeding or core aeration performed, we will call you prior to our coming out so that you will have time to flag all of your sprinkler heads and valve boxes. If you do not have any flags, we do have them available at our office at no charge. You may stop by our new office Monday through Friday between 8:00 a.m. – 4:00 p.m.. If you are currently a mowing customer, we are happy to deliver flags to you when we are out, please call our office to make arrangements.

Power slice seeding plants the grass seed into the soil in neat rows, ensuring that your seed doesn't wash away, and that you receive an even distribution. For most lawns, we recommend having this performed every three to five years.

Core Aeration pulls plugs from the ground at regular intervals, allowing the existing grass roots to expand and move deeper into the soil, making your established lawn hardier. For most lawns, we recommend having this performed every one to three years.

Over Seeding is less expensive than power seeding, and is a great way to add new life to an existing lawn that is already in good shape. We recommend having this performed every year, and for best results, having it performed in conjunction with core aeration.

Underground Sprinkler Systems are an ideal way to keep your lawn well-watered throughout the growing season. Our systems are designed by a certified irrigation designer, have a 5 year warranty on parts, and are easy to use! We also include rain sensors on all systems which will turn the system off when natural rainfall has already adequately watered your lawn, so that not only are you watering, but you are watering smart!
